Testimonials

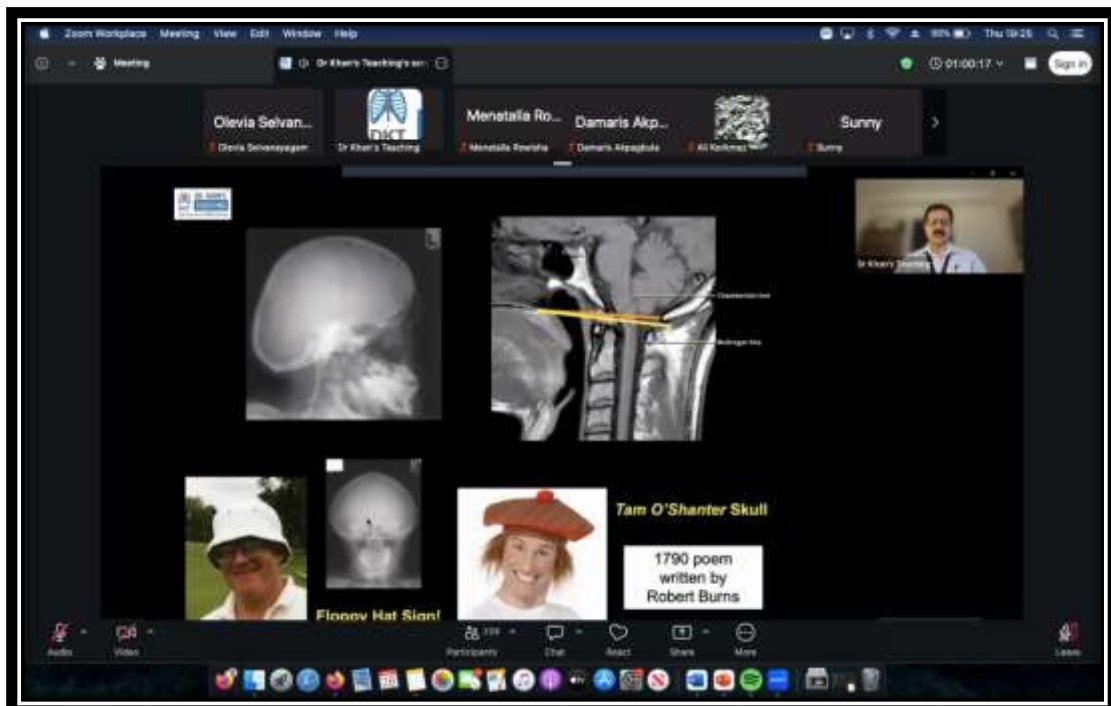

- I would like to sincerely thank Dr. Khan for his outstanding and insightful case discussions for FRCR 2B preparation. His teaching style, systematic approach, and detailed explanations make complex radiology cases easier to understand and interpret with confidence. I have gained more practical knowledge and confidence from his sessions than I did during much of my training. The effort and dedication he puts into sharing high-quality educational cases are truly appreciated by radiology trainees. His sessions are extremely helpful for improving reporting skills, image interpretation, and exam-oriented thinking, making them an invaluable resource for FRCR candidates (Somalia).
- I would like to thank Dr. Sami Khan for these important teaching sessions. It is a great privilege to be able to learn radiology from someone who is as experienced as you are and at the same time who is kind enough to patiently teach with all the enthusiasm. A truly gifted teacher! (Ethiopia).
- The lecture was very helpful to me. Again, every day we learn from Dr. Khan much of useful information about everything in radiology. From this lecture we gained a lot of useful explanations about the pathophysiology of varying diseases such as the basilar invagination and its mechanism and etc. I think these types of lectures can build a strong base for the exam and for day-to-day practise. Again, thank you Dr. Khan for your amazing style in providing these sessions! (Jordan).
- Super selected cases with clear concise feedback to candidates and very important tips for 2B exam in addition to pit of teaching for each case which deepens understanding and carries very important take home messages, many thanks to Dr. Khan and the team (Egypt).
- The discussions on the cases by sir are very useful. We come to know about what we missed in our mental checklist (Pakistan).

Pre-recorded FRCR 2B Practice Viva (Session - 151) - THE POT POURRI OF FRCR VIVA CASES - Top Tips, Differentials, "A to ZEE" & More! (Session 4)
