Testimonials

- The lecture was thoroughly enjoyable and highly valuable - typical of Dr. Khan's teaching style. It featured a clear, engaging explanation of the anatomy of the paranasal sinuses and oral cavity, alongside a presentation of various cases that are crucial not only for exams but also for the professional practice of any radiologist seeking to enhance their skills and produce diagnostically significant reports. The discussion regarding the differential diagnosis for the presented cases was also exceptionally precise. Finally, I would like to thank Dr. Khan once again for this outstanding effort (Jordan).
- Difficult topic was taught beautifully in case based bite size formats. Normal anatomy teaching transitioned smoothly to teaching of disruption of anatomy due to pathology to consolidate the concepts (UK).
- Satisfied with the session. These sessions are blessings for students who are non-affording! Thank you Dr. Khan for these lectures (Pakistan).
- Every aspect of the session was amazing - especially the teaching style (Nigeria).
- It was helpful learning how to correlate anatomy of PNS with common pathologies (UK).
- Excellent way of teaching, starting from basic anatomy to radiological anatomy and then to pathology identification! (Pakistan).
- The way Dr. Khan covers the very basics of every topic is the highlight for me (India).

- The session being a detailed explanation of the anatomy of structures which may be overlooked during reporting was useful (Pakistan).
