Testimonials

- The discussion regarding vessel involvement in oesophageal vs pancreatic cancer - I learnt something completely new which makes a lot of sense (UK).
- The session was a very rich reading on very important and variable cases (oesophageal, pancreas, CNS, Rectum, Septic Embolism, chronic PE) (France).
- This lecture by Dr. Khan reinforces concepts previously discussed, such as oesophageal tumours, Crohn's disease, and hyperparathyroidism in an engaging, smooth, and accessible manner. Furthermore, the session featured several novel and challenging cases that required a high level of diagnostic skill, such as a case of chronic pulmonary embolism that mimicked other conditions. Yet Dr. Khan's comprehensive explanations made the material easy to grasp. I would also like to highlight that today's cases covered various body systems and utilized a diverse range of radiological images, which greatly enhanced the learning experience. Additionally, the differential diagnosis for each case was excellent. Many thanks to Dr. Khan for his efforts (Jordan).
- Brilliant session as usual, cases are super selected, feedback is concise with very important take home messages for day to day practice as well as exam, Many thanks our great teacher and team DKT for time and effort (Egypt).
- Really enjoyed the session, excellent exam relevant cases, important tips and brilliant explanations. Thank you very much Dr Khan for your legendary teaching (Pakistan).
- I liked the unusual presentation of common pathology - e.g. chronic changes of ankylosing spondylitis (UK).
- Each case, with detailed explanations in different modalities, was elaborated in a wonderful way. Thank you very much (Pakistan).
- Everything taught was helpful (Qatar).
- Everything was amazing. I've always loved listening to Dr. Khan's lectures! (Pakistan).
- The tips by Dr. Sami were really useful (Pakistan).

Pre-recorded FRCR 2B Practice Viva (Session - 167) - THE POT POURRI OF FRCR VIVA CASES - Top Tips, Differentials, "A to ZEE" & More! (Session 17)
