Testimonials

- An excellent and highly informative teaching session. Dr. Khan's clear, systematic and practical approach is particularly helpful for FRCR 2B preparation. I sincerely appreciate the time and effort invested in providing such valuable teaching. Thank you very much, Dr. Khan and the entire DKT team (India).
- Brilliant session, variety of abdominal X-ray films with approach to deal with and so important take home messages, many thanks to our great teacher and team DKT (Egypt).
- The anatomy correlation with contrast study was most useful. I understood for the first time that the semilunar fold and haustra are same (Pakistan).
- All the lecture part was useful including the films and approach (Nepal).
- Theory detailing for FRCR was most useful (UAE).
- The teaching style and content was useful (Nigeria).
- Very interesting GIT lecture (France).
- The systematic approach to interpreting plain abdominal X-rays and the discussion of FRCR 2B viva cases were particularly valuable. The clear explanations and exam-oriented

teaching helped reinforce a structured approach to image interpretation and presentation (India).

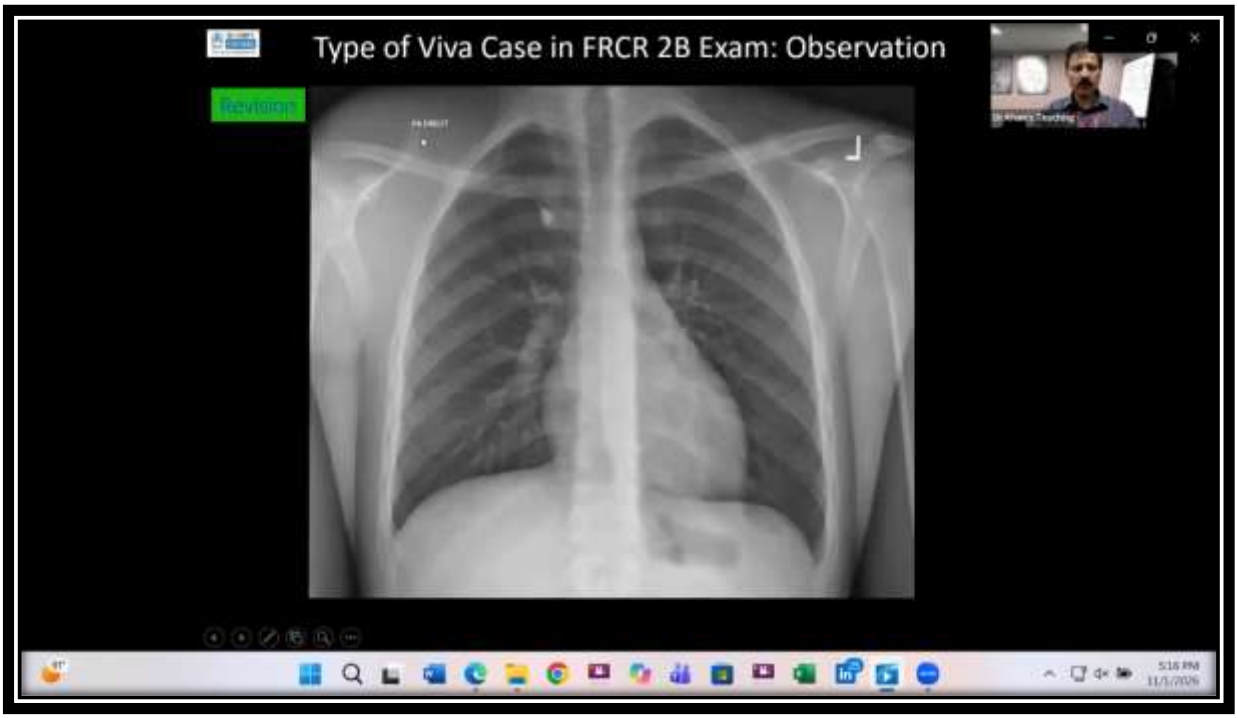

- His style of conveying concepts is good, clear and impactful. Correlating with CT, involving the audience and different good cases were useful (Pakistan).
- Stepwise approach starting with anatomy then proceeding with pathology was useful (South Africa).
- The variety of cases was useful (Sri Lanka).
- Going through the lectures again and again, even the basic anatomy lectures, I always learn something new in Dr. Khan's lectures. Thank you, sir (Pakistan).
- Dr Khan’s teaching was most useful (UK).
- Content, variety of films and complete coverage of topic was useful (Oman).
- Awesome (Indonesia).
- Very basic and useful detailed anatomy revision (Myanmar).
- All aspects were useful (Nigeria).
- 5 star (India).
